ABS-CBN

Backed by a successful track record, Etere is the trusted broadcast solution provider for ABS-CBN for over 15 years. Committed to excellence in service integration, Etere has developed and deployed a multi-pronged disaster recovery system for ABS-CBN Philippines.

### Disaster Recovery site in Cebu Province, Philippines

In November 2015, ABS-CBN Philippines will be equipped with a disaster recovery site in Cebu Province, Philippines that utilises Etere technology. The main SQL servers in Manila will be duplicated and synced seamlessly every 5 minutes with the disaster recovery site to ensure perfect alignment of any schedule modifications. Synchronisation settings can also be set to on demand.

This move ensures an automated, consistent and fast duplication of published playlists around the clock. The disaster recovery site which will be situated in Cebu province also serves as a physical redundancy that safeguards the data duplication process against unexpected failures such as earthquakes, flooding and power outages.

### About Etere Disaster Recovery System

Etere Disaster Recovery is a reliable system tool that safeguards the database and automation servers against temporary data loss through the seamless recovery of data in the event of an emergency. When both the Disaster Recovery and On-Air automation are configured to match, Disaster Recovery Automation will be perfectly aligned to the On-Air Automation to substitute the crashed automation and to ensure a seamless transmission.

### About ABS-CBN

ABS-CBN Global Ltd is a subsidiary company of ABS-CBN Broadcasting Corporation, the leader broadcasting network in the Philippines. In June of 2002 ABS-CBN Global decided to expand its business abroad, until then it had operated only in the Philippines. ABS-CBN operative broadcast complex is located in Manila, at the ABS-CBN Broadcasting Corporation Technical Operations Center.
