(AJA Products)

AJA's expertise in producing superior video technology advances Etere's ETX's video/audio compatibility and by employing AJA's superior quality video I/O devices, ETERE ETX enables customers to eliminate technical barriers and to expand interoperability.

AJA is an industry leader that provides its cutting edge technology to leading manufacturers and developer partners across the professional video industry for integration into their product lineups. High-profile media companies around the globe, along with broadcasters, networks, post-production houses, mobile truck operators, cinematographers, film editors and more, rely on the reliability, flexibility and performance of AJA technologies.

Please find attached documents regarding AJA products. Etere is ready to address your customer's concerns or to showcase our product line so please feel free to drop us an email at: marketing@etere.com

About AJA

AJA was founded by engineer John Abt in 1993. Today the company has a workforce of over 200 employees worldwide. AJA builds industry-leading video capture cards, digital recording devices, video routers, frame synchronizers and scalars, digital converters and professional 4K cameras for the professional video industry.
