# EA1356 ETERE WEB

The powerful, secure and user-friendly web interface that gives authenticated users the ability to manage all their assets and operations.

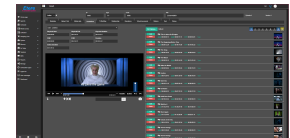

All-in web solution

Etere has developed **Etere Web**, a powerful tool that will help you in today's competitive marketplace in which organizations must extend information beyond the walls of their association and seamlessly interact with customers, partners, and suppliers in real-time.

Etere Web offers the best information exchange between internal entities such as departments, staff or systems and external entities like customers, suppliers or production managers.

All features on Etere Web have been designed to make the operator's job easy, fast and efficient. Etere Web allows you to stay connected and drive your business no matter where you are.

Key Features

☐ Support for all core functions of the Etere software application
☐ View and compare daily playlists in real time
☐ Integrated HTML5 Player designed for HTTPS protocol with faster speeds, better security
☐ Search, preview, edit, download and upload media files
☐ Subtitle preview
☐ Predefined post-upload and download workflows
☐ Resources management for users and supervisors
☐ Management of commercial orders and programming
☐ Tablet-compatible web client for fast and easy access
☐ Access to the Airsales system via Etere Web ensures complete access to your roaming sales force and the Commercial planning system
☐ Creating contracts and reservations is easy on any device

Mobile Interface

Etere Web allows users to easily perform tasks from any mobile device including Smartphones and Tablets based on iOS, Android and Windows Mobile operating systems. In this way decisions can be made more quickly and with fewer errors since data becomes visible across the entire organization and under a single database, thus allowing multiple users to work on the same object. The web client has been redesigned to perfectly display on the tablet the agenda calendar, assigned tasks, media previews, content approvals and any additional order task. Web users can now easily manage sales campaigns, approve delivered content, track ingest/editing rooms, monitor personnel shifts and access maintenance schedules.
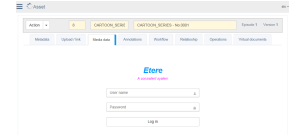

Enriched Browsing

Etere Web provides secure remote access to your Etere Database and Etere Cloud system from anywhere, a cutting edge player enables users to easily search and browse the media assets for which they are authorized to manage. The media player is fully enriched with all common playback controls including streamlined availability of subtitles, audio tracks and EDL marks.

Data Security

Etere Web ensures the most scalable security for all the system; it supports any firewall security applications, allowing furthermore defining several user-levels to access protected media. With the web integration, broadcasters can download video files and to subsequently upload them once edited. The user needs only the web credentials to access the system.

Etere Ecosystem Integration

Etere Web is integrative with all the main feature of Etere Ecosystem, including but not limited to,

☐ Etere Airsales, to check/create/book orders and and to consult customers contracts
☐ Etere HSM, to manage the archive status of assets
☐ Etere Media Asset Management (MAM), to search and manage the media library
☐ Etere Data Mover, to track the migration between devices in real-time
☐ Etere Tapeless Reception, to receive and deliver video files
