

Etere Radio-Live Integrates Advanced Fade Configuration

Etere Radio-Live gives you more options with a new addition of advanced fade configurations. This new software feature is a free upgrade for all Etere users on a support contract.

Etere logo

Radio Live

Etere launches a new addition of advanced fade configurations for its **Radio-Live Payout**, including the capability to manage fades directly from the playlist. Users can create a waveform for an asset via automated workflows and apply fade configurations on a selected section. It is also possible to edit selected parameters of the three materials, previous - current - and next, in the playlist with the relative waveforms.

Additionally, users can preview the changes instantaneously on the same interface once the fade is applied.

Key Features

- Manages fades directly from the playlist
- Displays the waveforms with different colours or with the same colour
- Edit selected parameters of the three materials: previous - current - and next, in the playlist with the relative waveforms
- Preview the changes instantaneously
- View the waveform of an entire timeline on a thumbnail

Etere is committed to its research and development to integrate the latest technologies, to empower its users with the next efficiency level. Contact our product specialists to find out more.
