

ETERE OPTICAL CHARACTER RECOGNITION (OCR)

Metadata is essential to find the video you need, especially in a vast media library. Etere facilitates multiple automatic metadata tagging, including OCR, Face Recognition, and Speech-to-text in video images.

Optical Character Recognition (OCR) technology recognizes text within a digital image. It is commonly used to identify text in scanned documents and photos. With OCR technology integration, users of Etere can convert a physical paper document or an image into an accessible electronic version with text.

OCR

Key Features

- Provides the software tools to enhance content management and optimisation
- Streamline your media library to enable easy search and retrieval of assets
