What is SRT MPTS?
Multiple Program Transport Stream (MPTS) allows the transmission of multiple programs within a single transport stream, combining audio, video, and data bitstreams. With Etere's support for SRT MPTS, broadcasters can now effortlessly record MP4 and TS files containing several video streams.

Key Benefits:
■ **Optimized Streaming Performance:** SRT MPTS enhances streaming capabilities, ensuring reliable performance even over unpredictable networks
■ **High Resilience:** Secure Reliable Transport (SRT) utilizes dual-stream transmission to adapt to bandwidth fluctuations, providing seamless connectivity despite internet congestion
■ **Cost-Effective Distribution:** MPTS offers a more cost-effective alternative to traditional satellite channels for internet-based distribution
■ **Versatile Output:** Enjoy compatibility with both NDI and SDI streaming outputs
