The integration empowers a single operator to effortlessly control both playout and graphics. By consolidating these two essential functions into a single, unified platform, it eliminates the need for multiple systems and reduces the need for additional personnel or resources, ultimately leading to cost savings. This seamless approach not only reduces the complexity typically associated with managing separate systems but also ensures smoother, more efficient operations. With RT Swift Software's cutting-edge tools, operators can easily switch between playout tasks and graphic overlays, making real-time adjustments with minimal effort.

Etere, known for its robust and fully-integrated Ecosystem workflow, offers a user-friendly interface that simplifies complex tasks. This ensures a smooth and intuitive operation for broadcasters, enabling them to control all aspects of their production process from one software interface. Etere is an ideal choice for organizations seeking to optimize resources without compromising on performance or quality.

About RT Swift
RT Swift delivers cutting edge virtual studio and augmented reality graphics environments. It allows you to immerse your presenters into a completely realistic 3D world or drop in augmented reality objects during live sports or news shows.
