Etere 36.1 Adds Full 8K Support Across the Ecosystem

Etere announces version 36.1, a highly anticipated software update that introduces complete support for 8K workflows, including 8K UHD and 8K Digital Cinema Initiative (DCI) resolutions across the Etere ecosystem. Delivered as a free upgrade, Etere 36.1 helps broadcasters and content owners prepare for next-generation production and delivery without disrupting existing operations.

Etere 36.1

With this release, real-time 8K playout, preview, and recording are powered by GPU acceleration for demanding broadcast and live environments, while offline and back-office workflows including content management, scheduling, library, and archive—remain fully supported on standard CPU-based infrastructures. This approach preserves current investments in both GPU-enabled and CPU-only systems, while enabling a smooth introduction of 8K into day-to-day workflows.

With Etere 36.1, customers can manage end-to-end 8K workflows with:
- Real-time 8K playout and recording on GPU
- 8K media management on CPU for non-real-time operations
- Full compatibility across UHD and DCI 8K standards

Supported 8K resolutions

8K DCI
- 23.98p, 24p, 25p, 29.97p, 30p
- 47.95p, 48p, 50p, 59.94p, 60p

8K UHD
- 23.98p, 24p, 25p, 29.97p, 30p
- 47.95p, 48p, 50p, 59.94p, 60p
