

Etere is now Compatible with Yandex SpeechKit

Etere announces support with Yandex SpeechKit, enabling broadcasters, post-production houses, and media enterprises to add fast, accurate, and scalable speech-to-text capabilities directly into Etere workflows. This is a free upgrade for all users who have the speech-to-text module.

Yandex speech recognition

The Yandex SpeechKit (EA1439 - Yandex Speech Recognition) update delivers real-time and batch speech recognition, automatic language detection, and natural text-to-speech to help media businesses automate voice interactions and transcribe audio with high accuracy.

Supported Languages includes **Russian, Kazakh, Dutch, Uzbek, English, Turkish, German, Spanish, Swedish, French, Finnish, Hebrew, Italian, Polish, and Portuguese.**

Key Features

- **Capture subtitles:** Export and create subtitles with the selected language
- **Flexible recognition modes:** Creates subtitles for recorded videos and audio.
- **Transcribes in real-time:** Suitable for live-streams
- **Automatic language detection:** Identifies the speaker's language without manual configuration.
- **Natural speech synthesis:** Converts text into speech using standard voices and customizable brand voices for consistent brand identity.
- **Mark vocals:** Mark the stressed vowels to clarify the correct pronunciation of words.
- **Phonemes:** Mark the correct pronunciation of words using phonemes.
- **Add emphasis on selected words:** Emphasize essential or important words for a more dynamic speech
- **Text normalization:** Configure to present date and time in numerical format or convert numbers from text to digits
- **Customizable speaker's speech rate:** Configure the speed of the speaker's speech to suit the context
- **Customizable voice pitch for the speaker:** Configure the speaker's voice pitch
