TVRI

TVRI powers the World Cup 2026 with next-gen media management. Together with distributor, **PT Galva Technologies**, Etere has delivered a new LTO9 archive and the unified **Etere Ecosystem** — a seamless framework where workflows run under one central control system.

Backed by a fully integrated database, Etere Ecosystem ensures peak efficiency, reliability, and unmatched performance for one of the world's most watched sporting events.

■ **Etere ETX** delivers a IT-based video management solution that integrates multiple input and output capabilities into a single, intuitive interface. With its mixing, CG, branding, and advanced audio/video functions, it provides broadcasters with a seamless, all-in-one platform for efficient and dynamic content management and playout.

■ **Etere Transcoder** Total flexibility for decode, encode, transcode, mux/demux, filtering, and frame-rate conversions across standards.

■ **Etere Multichannel Ingest** Ingest and playback of 4K/HD/SD from NDI, SDI, IP feeds, live streams, or file imports, up to six streams at once.

TVRI's integration of the **Etere Ecosystem** ensures consistent, high-performance delivery of the World Cup 2026 across Indonesia.
