

Etere Launches Piper Text-to-Speech Integration

Etere integrates with Piper Text-to-Speech to deliver fast, natural-sounding voice generation directly within broadcast and media tech workflows.

Etere logo

Piper_Text_to_Speech

Powered by AI, the solution lets Etere users transform written text into lifelike speech in real-time, without leaving the Etere interface or switching between applications. As all processing takes place locally and offline, confidential data remains protected while the risk of external data exposure is reduced.

Key Benefits

- **Fully offline operation:** Runs locally on your machine or device without an internet connection
- **Enhanced data privacy:** No data is sent to external servers, all processing takes place locally
- **Downloadable voice models:** Select and download voice models suited to your requirements
- **Natural, expressive speech:** Produces realistic voices with natural intonation, pitch, pace, and prosody
- **Emotional voice delivery:** Adjusts vocal expression to better match the intended tone of the content
- **Reliable high-volume generation:** Creates hours of audio consistently and efficiently
- **Windows and Linux compatibility:** Supports deployment across both Windows and Linux operating systems
- **Extensive multilingual support:** Supports more than 40 languages and regional accents, including Arabic, Catalan, Czech, Danish, Dutch, English, Finnish, French, German, Greek, Hungarian, Icelandic, Italian, Kazakh, Norwegian, Polish, Portuguese, Romanian, Russian, Spanish, Swedish, Turkish, Ukrainian, Vietnamese, and Chinese
