

Etere expertly navigates the complexities of post-production, tackling challenges in media and metadata management with innovative solutions. Its seamless third-party integrations deliver a perfect blend of cost-efficiency and high reliability, ensuring a streamlined workflow and optimal performance.

Etere Post Pro

Etere ETX-G

ETX-G 's seamless integration with Etere Airsales supports the logging of invoices for both automatically and manually triggered graphics. In addition, real-time connectivity with Etere Executive Editor manages your commercial graphics and broadcast schedules, ensuring a smooth transition and playout. Etere's STMan incorporates a graphic controller for automatic playout and comes with the ability to control multiple graphics for a single primary event.

ETX-G's load balancing capabilities distributes tasks across several resources for a fault-tolerant and reliable performance.

Etere QC

Etere QC is an integrated file-based module for performing Quality Control (QC) via a streamlined workflow. It automatically detects and marks audio/video issues (e.g. freeze frames, black frames, scene changes, audio loss) on assets' EDL according to their quality, setting also a default quality rating at the end of the process. Etere QC is able to speed up, automate and streamline the operational efficiency of file-based quality controls performed via workflow across the entire content life cycle.

Etere Advanced QC

Ensure content readiness and get the best returns on your investments only with Etere Advanced QC which boasts speeds of QC tasks that are faster than real time. The powerful software is able to analyse up to 4 files at the same time with the basic licence. Etere Advanced QC is a robust, cloud-ready software that is both cost effective and advanced. The web based video quality check software is built

with power-packed features designed to streamline QC analysis configuration and to avoid inaccurate and time consuming checks.

Etere Proxy Browsing

Etere Proxy Browsing is an indispensable and powerful tool designed to elevate the modular ecosystem of the Etere System. Engineered for versatility, it expands the capabilities, functionality, and integration of all Etere software modules, including Media Asset Management, Etere Executive Editor, Etere Scheduling, Etere Ingest, and more. With Etere Proxy Browsing, users gain seamless access to essential features such as ingesting, editing, previewing, playout, and archiving—enhancing productivity within a dynamic digital newsroom. This software empowers professionals with efficient media handling, ensuring a streamlined and comprehensive workflow.

Etere HSM

Etere HSM is a tool to move and optimize video contents between different media. The data movement policy is applied to get the best compromise between cost and speed. Etere HSM manages all archives in a single integrated environment, supporting a mix of proprietary and/or industry file systems under a unified cockpit that provides all information on archives located on-site and across multiple geographic locations.

Etere Tapeless Reception

Etere Tapeless Reception manages all your digital contents from external sources such as production companies, advertising agencies, etc. Etere Tapeless Reception allows you to implement a web service-based portal framework for remote content reception, where digital files and metadata can be received under a fully monitored system integrated with post-delivery workflows. Etere Tapeless Reception allows the integration of NLE systems (e.g. FCP, Avid, Edius, etc.) and other file-based sources within the station's archive, this web-based solution is cemented on the latest streaming technologies for video distribution.
