

Etere Supports All New Windows and SQL Releases

Etere has released an updated list of recommendations for Etere-Windows configuration as well as information on Etere's upcoming new releases.

Etere logo

Microsoft Windows Compatibility

Microsoft SQL Server compatible

Etere supports every new Windows and SQL release and this is done via Windows compatibility with older versions. Win2016 compatibility is for Etere software only. For hardware components such as capture and playback cards, GPI, Timecode, H264 and H265 encoders, Serial Adapters and all other similar devices, please check the drivers' OS compatibility with the respective hardware manufacturers.

Recommended Configurations:

- Server OS: Windows 2012
- Server OS: For Etere MTX and CensorMX Windows 2008R2 (this is mandatory)
- SQL Server : SQL2014
- Client: Windows 7

Other Possible Options:

- Server OS: Windows 2016
- SQL Server : SQL2016
- Client: Windows 10

OS that are NOT Recommended:

- Windows 8
- Windows Vista
- SQL Server 2008 and older
- Windows XP and older

Antivirus Software:

- Antivirus software may disrupt the OS timing synchronization, thus, it is NOT recommended to use antivirus software on servers managing real time video.

Future Releases:

- Etere 28 (2018) , Etere 29 (2019) and Etere 30 (2020) will be compatible with SQL 2014 and SQL 2012
- Etere ensures that Microsoft software compatibility remains relevant and updated

Virtual Machine (VM):

- All releases of Etere are compatible with Virtual Machines and can run from Virtual Machines
