ETX-M

Etere ETX-M Multiviewer lets you view multiple videos, live feeds, and more, all from the same screen, all at once. Enabling unlimited feed inputs, the sky is the limit with the powerful **Etere ETX-M Multiviewer**. Regardless of the size of your workflow, **Etere ETX-M Multiviewer** can be integrated seamlessly, saving you space and lowering operating costs.
Playlist Next Event Display
The next event display previews what's playing next, allowing for edits and eliminating the need to check the playlist. Multi-channel monitoring has never been easier.

High Performance
With Etere, you can quickly deliver large quantities of content in multiple formats and broadcast it across various devices. Manage up to 9 display monitors and unlimited input sources at any time. Integrated with a configuration screen from which the system administrator can specify the required layout: the number of players the size of each specific player, with the possibility to mix players of any size, clocks, and labels for channel names.

Key Features

☐ View unlimited SD, HD, and Ultra HD sources simultaneously
☐ Integrated with Etere ETX Legacy Converter, which converts SDI in and SDI out in IP or NDI streams with very low CPU impact
☐ Integrated with Automated Loudness Control, which monitors and corrects transmission volume errors as well as prevents excessive audio jumps
☐ Next event playlist display
☐ High redundancy, acts as a gateway to external I/O; every I/O is independent
☐ Manage IO sources - UDP/RTP/RTSP/RTMP/SDI (require I/O card)/SMPTE 2110(require I/O card)
☐ Integrated with automated and instant email notifications of errors
☐ Easy to setup with only a Windows PC configuration
☐ Professional quality multi-signal live preview and recording
☐ Up to 9 display monitors
☐ High redundancy with fault-resilient performance
☐ Automatic and instant error notifications
☐ Preview of next video and graphic event
☐ H264 and H265 encoding/decoding
☐ Multiple clocks display allows more time zones
☐ Etere ETX-M Multiviewer is automatically connected to your Etere Ecosystem

Automatic Mail Alerts

☐ Detailed mail settings can be configured to provide all reports and errors automatically, including visualization and signalling of freeze, black, silence, PID lost, service lost, and input lost behaviour
☐ Automatically sends alert emails and log files to the configured email addresses when an error is detected

Media Management

Users are also equipped with email notification alerts, log reports and real-time previews for a truly automated solution. With real-time analysis, Etere ensures that your system is running at optimum levels at all times.

Seamless Integration

With **Automation**, **Ad insertion**, and **Multiviewer**, get the best user experience. Fully integrated with your playlist, enjoy most of the work, a single price solution with all the features of a modern system. Able to use the existing Multiple Gigabit connection.
