Etere Nunzio Platforms

Nunzio flowchart

Radio is a popular and essential medium on which news is consumed. **Etere Radio News** empowers you with the software tools to manage the end-to-end radio news broadcasting process effectively.

Broadcasters can enjoy a fuss-free news reporting process with the powerful and user-friendly **Etere Radio News**. Etere manages the complete radio news broadcasting process, from newscast gathering, content creation, recording, and editing to actual on-air broadcasting and story archiving. Simplify the news broadcasting process from conception to broadcast. Etere Radio News includes features such as accessible rundown management, collaborative story production, planning, scheduling content, editorial approvals, and the management of commercial breaks. Enjoy a streamlined work experience when your radio newscasters and reporters can access all scripts from the Etere Radio News interface.

News Sources

Pick up your news from multiple reputable sources, such as Bloomberg or Reuters, with the supplier-compliant protocol that Etere Radio News software supports. The software is compatible with the standard market protocols such as AFP (Agence France Presse), Reuters, AP, Bloomberg, IRN, etc. The newswire can also be received in multiple languages.

Editing Suite

Etere Radio News provides a full editing suite for you to edit news broadcasts quickly before they go on-air. Record and edit your work and create comprehensive news packages by directly linking audio elements from the media database into the news story. The editing suite allows you to play back your audio as many times as needed during the editing and recording.

Story management

Quick edit scripts or change the story sequence in the playlist during live broadcasts.

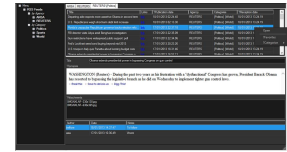

View live playback or preview directly from the story screen. A customisable interface allows users to change the software layout as required.

Fully Accessible

Keep track of your news and edit bytes even on the go with the fully accessible Etere Radio News. The software can be accessed on PCs, tablets, and mobile devices. You can also record sound bites on the move with the compatible Radio News. Meanwhile, let your colleagues handle the editing with the integrated archive system that allows users to access each other's files from any location and at any time, significantly speeding up the news process.

News Wires

The Etere Radio News is a centralized collection point for incoming agency wires, which are immediately available for users. The system recognizes all standard agency formats (IPTC or NewsML) and can store an infinite quantity of wires in the Etere database over a long period. Wires in multiple languages can be managed simultaneously.
