

ETERE NUNZIO GRAPHICS PLAYER

Etere Nunzio Graphics Player is the most effective solution for news studios, seamlessly integrating live and recorded video content playout while offering the flexibility to insert graphics directly into the stream. This capability ensures unmatched quality and adaptability, empowering broadcasters to easily deliver captivating visual experiences to their audiences.

Nunzio Graphics Player

Etere Nunzio Graphics Player is an integrated software that enables the playout of live and recorded video content, with the option to insert graphics directly in the playout. Etere Nunzio Graphics Player supports live sources, including SDI and NDI, streamlining the complexities of multi-format deliveries. In addition, Etere features an automated start for live inputs that play immediately after a previous event and allows minimal manual interventions. Etere empowers broadcasters to air their graphics without relying on any 3rd party software.

Besides its playout capabilities, Etere Nunzio Graphics Player enables the direct insertion of graphics in the playout for a more efficient workflow. Media files can also be played on a secondary output, for instance, a monitor behind the newscaster.

Etere Ecosystem is entirely scalable, making it a system that evolves with the users' needs.

Key Features

- ☐ Intuitive interface with presets
- ☐ Preview media files with graphics before playout
- ☐ Play from live sources, including SDI and NDI
