- ☐ Eliminates technical barriers and promotes seamless transfer of media files anywhere, anytime

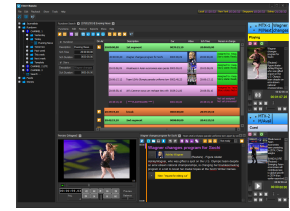

NUNZIO

News plays a significant role in the broadcast lifecycle, so Etere Ecosystem became richer with a full newsroom management system.

Etere Ecosystem greatly improves coordinated multi-media planning and collaborations across different production units such as radio, TV or web departments, editorial-driven workflow and metadata management. With **Etere Nunzio Newsroom**, you can work better, faster and achieve an amazing result.

NUNZIO comes from a Latin word that means news speaker. Etere offers a single unified system with full NRCS capabilities, integration for video editing, fast editing with voice-overs and virtual stories that can be played without conforming. Etere Media Upload is a logical progression in making media and information available to Etere users wherever they are. This convenient application enhances collaboration, an important advantage in news operations and fast-paced broadcast environments.

Direct and Fast Connectivity

Expand interoperability and eliminate geographical barriers with Etere Media Upload.

The software provides the easiest way to select stored videos, audio and images. Users are also able to transfer these files directly to Etere NUNZIO without the use of any third-party software. In fast-paced news reporting environments, Etere Media Upload allows you to save time and costs. In addition, the application promotes connectivity across distributed work environments.

Stay in touch with your newsroom via quick tracking. You can track your files easily using three tabs, namely, checking queued, checking failed and completed transfers.
