Etere 36.1

Linux Logo

This year marks an important milestone. Due to the continued hurdles set by Microsoft to have on-prem servers and the push to move to the cloud, we are going to offer the option to have Linux. We understand our customers' requirements, and that cloud is not a viable option for many of them; therefore, we have to move forward and offer the best product possible to you, as we have for the past 36 years. This is one of many innovations we're bringing this year, and here are other new features (free for users under a support contract) for version 36:

- **NVIDIA NVENC interlaced encoding for H.264 (AVC) and H.265 (HEVC)** broadcast workflows
- **8K-ready media management** with native support for **8K UHD** and **8K DCI**
- **Next gen Radio Live upgrades:** GPI/GPO + mixer channel control, mic monitoring feedback, and **dual PGM output**
- **WordPress auto-publishing** to self-hosted WordPress sites
- **Live Program Conforming** with automatic end-of-live triggers and configurable delays
- **HSM HQ work queue enhancements:** abort/delete tasks, dynamic priority changes, and drive reassignment
- **ActiveSync scheduling upgrades** (continuous or timed sync)
- **SRT ingest & record support** in Web Promo Manager (BMS)

Future-proof your operations with Etere, a trusted leader dedicated to continuous innovation.
