

EA6785 ETERE TMDB INTEGRATION

Etere is integrated with The Movie Database (TMDB). With just a few clicks, your films and TV shows can come alive with data including posters, backdrops, cast info and ratings filled automatically. No tedious data entry, no juggling multiple sources, just everything you need, ready when you need it.

Etere logo

With Etere's integration with The Movie Database (TMDB), you can simply pull in key details for any asset: titles, original titles, release dates, genres, overviews, taglines, runtime, and status. Visuals are updated too, with posters, backdrops, and logos that completes your library. Furthermore, cast and crew information is included, so you can explore talent connections and discover new ways to organize your content.

TMDB's community-driven ratings, popularity scores, and vote counts help you see what's trending, while budget and revenue data provide insight into how your content is performing. Best of all, everything updates automatically through Etere workflows, so your library stays up to date without lifting a finger.

TMDB Logo

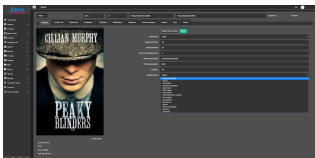

Now you can stop wrestling with spreadsheets and start focusing on what matters: Exploring, discovering, and enjoying your media library like never before.

Key Features

- Retrieves data using Etere Workflow for an automatic update of your media library
- Key asset details including titles, original titles, release dates, genres, overviews, taglines, runtime, cast and crew information and status
- Posters, backdrops, and logos for your assets
- Community-driven ratings, popularity scores, and vote counts provide insights on trends

About The Movie Database (TMDB)

The Movie Database (TMDB) is a community built movie and TV database. Every piece of data has been added by our amazing community dating back to 2008. TMDB's strong international focus and breadth of data is largely unmatched and something we're incredibly proud of. Put simply, we live and breathe community and that's precisely what makes us different. www.themoviedb.org
