

Etere AI Identifies Songs and Fills Your Music Metadata Automatically

Etere AI can now identify songs automatically and enrich media assets with detailed music metadata, including artist, album, genre, record label, release date, and cover artwork. Stop wasting time entering music metadata manually.

Etere AI

Etere Web Metadata for
Soundtrack

With Etere AI, songs can be identified automatically and their metadata added directly to your media assets. The result is a richer, cleaner, and more searchable media library without adding another manual task to the workflow.

As soon as Etere AI detects a song, it retrieves key information including the artist, album title, genre, record label, release date, and cover artwork. This gives broadcasters and media companies more complete and accurate metadata while significantly reducing repetitive manual work.

For large media archives, the difference can be substantial. Content that was previously difficult to identify or search can become instantly more useful, allowing users to find songs, artists, albums, and related media much faster.

Because the feature is fully integrated into the Etere Ecosystem, song identification can be included directly in existing workflows. Music metadata can be enriched automatically as content is ingested, processed, archived, prepared for playout, or distributed.

Better metadata means better content discovery. Users can search and organise media by artist, album, genre, release information, and other music-related fields, making archived content easier to find, reuse, programme, distribute, and monetise.

Etere AI does the listening. Your archive gets the information.

With automated song identification and metadata enrichment, Etere AI helps turn your media library into a smarter, more valuable content resource.

Contact Etere to discover how AI-driven automation can improve the way you manage, search and reuse your media.

About Etere

Since its beginnings in 1987, Etere has been preparing users for the future. Etere is a worldwide provider of broadcast and media software solutions backed by its mark of excellence in system design, flexibility, and reliability. The revolutionary concept of Etere Ecosystem promotes real-time collaborations and enhances operational efficiency across the entire enterprise. Etere Ecosystem software solutions manage the end-to-end media workflow and feature an integrative Web and Windows architecture that is customizable to fit perfectly in any system.

Etere delivers on its service excellence commitment with a 24/7 worldwide support and inclusive software updates. Its digital technologies and market-proven remote/on-site services such as consultancy, training, installation, and demonstrations are ready to run with your business no matter where you are. Etere enhances your adaptability for the future and empowers you with the most innovative software tools to drive your business to greater heights.
