Microsoft SQL Server

What is Microsoft SQL Server Always On

Microsoft SQL Server Always On is a suite of built-in high-availability (HA) and disaster-recovery (DR) technologies introduced in SQL Server. It serves as an enterprise-level successor to database mirroring.

The new database infrastructure provides a robust foundation for business continuity. Built on SQL Server Always On Availability Groups, it supports synchronized database replicas and planned failover capabilities, helping DAAI TV maintain service availability, reduce the risk of disruption, and recover more effectively from unexpected system events.

As audiences increasingly expect accessible and uninterrupted access to digital content, dependable technology is essential and Etere is ready to support the organisation's evolving operational needs.

About Daai TV

DAAI TV is an Indonesian television channel associated with Tzu Chi Indonesia, the Indonesian branch of the Buddhist Tzu Chi humanitarian organization. The channel began broadcasting in Indonesia in the 2000s and is known for programming that emphasizes humanitarian values, education, health, social welfare, environmental awareness, and community activities. Its content is presented primarily in Indonesian, while selected programs also include Mandarin-language segments.

The schedule includes documentary-style reports, educational programs, interviews, cultural features, charity-related coverage, and programs connected to volunteer and humanitarian activities in Indonesia and other countries. DAAI TV is widely recognized for its non-commercial and socially oriented broadcasting approach, reflecting the values promoted by the wider Tzu Chi movement.
