

Radio TV Link: TVRI Expands with Etere for a New Ingest Station

TVRI, a customer with Etere since 2005, reaffirms confidence in Etere system with the new addition of a ingest station based on MTX technology.

TVRI Logo

customer of Etere since 2005, TVRI, once again renews its vote of confidence with Etere.

TVRI has selected Etere for the installation of a new ingest station consisting of 8 channels based on MTX technology to meet increased demands.

Ingest is a critical process of any production and broadcast workflow, errors committed in this stage are always costly and time consuming for a company. Etere provides the perfect balance between video quality, storage usage and operational costs thanks to a all-in-one solution that is able to capture content from almost any analog and digital source used in the industry.

With the expansion of this integrated, flexible and cost efficient distributed architecture, TVRI is all set to raise the bar once again!
