EVS

Etere, leader in the media market with a wide range of high technology software for broadcasting and media companies, is pleased to announce the introduction of a new advanced driver for the integration of the renowned EVS XT2 video production server.

Etere is now capable of integrating EVS into its tapeless workflow (TV Automation, Media Asset Management, Archiving, News integration, Web & NLE integration) to fulfil growing customers' needs and business requirements.

Etere considers EVS as an important partner, due to its reputation as one of the most important players in the broadcasting market as well as its focus on reliability and customer satisfaction.

Nicolas Bourdon, Marketing and Communication Director for EVS said:

“We are proud to collaborate with Etere on improving customers' workflows. Our excellent working relationship has led to the development of a software solution that interacts with our renowned XT2 video production server. Etere provides both crucial user functions such as ingest, content management, editing and playout as well as background capabilities which are crucial to the overall operation of broadcasting systems. For this reason Etere has played an important role in improving broadcasting workflows. Our video production server, and its related software applications power the most demanding live production workflows in sports broadcast and tv programs around the world.”
