

## ETERE TECHNICAL SUPPORT

Etere Technical Support helps to resolve technical and operational issues, analyze your system and support any technical enquiries.

Etere Technical Support  
Diagram

The Etere team is on standby 24/7 to help you succeed and get the results you need; whether it is troubleshooting an issue or customizing workflows, the Etere support service is always available for all Etere users on a support contract. Furthermore, Etere users have access to unlimited software updates and upgrades, keeping your system optimized for the best performance at all times. As part of its commitment to users, Etere invests in its Research and Development to release new features, upgrades and security patches several times per year, keeping your Etere system optimized at all times.

Etere provides remote access assistance in troubleshooting, reconfiguring or increasing operational efficiency in the environment. Every incident that our customers log comes with an identification number that would be sent via e-mail, skype or telephone. For greater convenience, customers are given access to a portal on the web where they can view the incident status anytime and from anywhere as long as they have an internet connection.
