17/5/2010 Event

Etere at Radio TV Forum Rome

Radio TV Forum conference and exibition
Rome - May 25th and 26th 2010

Logo of RadioTV Forum

First organized in 2006, the AERANTI-CORALLO RADIOTV FORUM has become a focal point for the radio and television sector. The two-day event is held annually in Rome, Italy. In addition to the programme of meetings, technical seminars and workshops on key issues facing the sector, the AERANTI-CORALLO RADIOTV FORUM also features an exhibition, where an ever-increasing number of visitors can ‘get their hands on’ the latest innovations available from both Italian and foreign solution providers.

Speakers at the AERANTI-CORALLO RADIOTV FORUM include representatives of official bodies and political institutions, as well as industry experts, all contributing to enrich and enliven the discussions with their own specific knowledge.

As of 2009, AERANTI-CORALLO RADIOTV FORUM also comprises ‘WORKSHOP DAY’, which features technical seminars and meetings with companies, and which focuses on a specific issue facing the broadcast world.

This year, the event, taking place in Milan, Italy, will focus on digital terrestrial TV and all the issues that face television broadcasters as they await the imminent definitive changeover to digital transmission technology.

Etere shows it's products including the new MTX playout system.
