

ENTERPRISE AUTOMATION

A solid enterprise automation strategy can improve operational and cost efficiency across all departments. Etere Enterprise Automation solutions help you to develop a strategic approach towards media process management.

Etere Playout Automation

Take the first step to achieve the results-driven success that you want. We can help you attain results that are tailored to your success.

Etere Automation

Etere Automation provides a complete solution for all your playout automation requirements and mission-critical tasks. It features an innovative, highly scalable, reliable and flexible design, empowering users with the agility to thrive in fast-paced environments. Etere Automation combines real-time device control capabilities and media asset management in a single product.

STMan Workflow

Etere Subtitling and Closed Caption

Etere Subtitling and Closed Caption Software is a digital platform for creating, managing, burning, playing out and converting subtitles, captions and other text services for production, post-production and live shows. It allows broadcasters to freely produce subtitles in multiple languages, search by metadata for multi-platforms, and streamline the process with real-time sharing of edits without hardware.

Etere Disaster Recovery

Etere Disaster Recovery is a fully integrated, robust solution that automatically protects your data with reliable contingency and quick response time in case of a facility failure.

Etere Ingest

Etere STMan

Etere STMan is the application that provides broadcasters with a multi-layer and real-time management of secondary objects associated with scheduled events.

Etere Ingest

Etere Ingest is an all-in-one package that enables you to capture media from all common feeds into cloud storage and apply to it any required workflow, thus giving a unique mark of quality, consistency and reliability to your assets and their contents.

Etere Memory Audio Logging

Etere ETX-G

ETX-G is a commercial graphics management software with an efficient archive for all graphics databases. Its intuitive user interface enables SDI-supported, real-time previews and instant addition and deletion of graphics anytime before playout.

Etere Executive Scheduling

Etere Executive Scheduling is the complete planning solution that significantly boosts the efficiency of your short and long-term playlists.

Etere SNMP Console

Etere SNMP Console is a highly customizable solution that optimizes all processes, infrastructure performance and devices within a single interface.

Etere Media Manager

Etere Media Manager is a highly effective digital content management solution specifically designed to streamline the process of ingesting, indexing, storing, and retrieving digital assets.

Etere T-Workflow

Etere Workflow

etx m multiviewer

Etere T-Workflow is an essential part of the broadcasting process not only because it allows the set broadcasting management rules but principally because it expresses how modules interact to perform the broadcasting process, making it easy for the operator to understand how the system works.

Etere F90

Etere F90 is a module that provides a more efficient connection between two different systems and guarantees maximum accuracy in the information importing and exporting processes through a fully automated and paperless data flow application.

Etere Proxy Browsing

Etere Browsing is a must-have and powerful software to enhance the modular world of the Etere System. It has been developed to increase the range, functionality and usage of all Etere software modules.

Etere Tapeless Reception

Etere Tapeless Reception manages all your digital content from external sources such as production companies, advertising agencies, etc. It allows you to implement a web service-based portal framework for remote content reception, where digital files and metadata can be received under a fully monitored system integrated with post-delivery workflows.

Etere Automation Backup and Clone

Etere Automation provides reliable performance and flexibility with multiple fault tolerance and redundancy options. In media productions, having a reliable and flexible backup system is indispensable. Etere delivers the benefits of an effective redundancy system with all the fault-tolerance options you need to optimize your system perfectly to your needs. Etere Automation's database-independent capabilities enable different levels of fault tolerance, including backup mode, master/clone mode and backup one-to-many mode.

Etere Multichannel Editor

Etere Multichannel Editor provides an integrated interface for the real-time management, editing and control of all your channels. The application integrates seamlessly with Etere Executive Scheduling and Etere STMan, enabling quick edits, movements and insertions of Secondary Events.

About Etere

Since its beginnings in 1987, Etere has been preparing users to be ready for the future. Etere is a worldwide provider of broadcast and media software solutions backed by its mark of excellence in system design, flexibility and reliability.
