Etere solutions manage the end-to-end media lifecycle of broadcast and media enterprises. Take the first step to achieve the results-driven success that you want. We can help you to attain results that are tailored to your success. Chat with us to find out more.

Make your Content Work for you
In today's fast-changing and creative environment, archiving plays an essential role in running an Ecosystem that integrates your content effectively. With its suite of advanced features that power your end-to-end archive management, The Etere HSM solution includes **Hierarchical Storage Management**, **Disk Library** and **Geographic Redundant Archive** that allows you to build your perfect object storage ecosystem, utilizing asset management, workflow orchestration and transcode modules to ensure that your assets are always stored in the most efficient storage tier, and delivered to the right location in the required format.

The Etere HSM solution is an intelligent storage and asset lifecycle management platform that seeks to streamline the storage process for media and IT companies alike. Enabling simple creation of powerful workflows, it features automated tools for migrating content across hardware versions, storage tiers or from legacy systems to next-generation storage platforms.

The integrated workflow orchestration helps automate multi-vendor and multi-format file transformations, across unlimited storage tiers in a hybrid cloud environment. Etere HSM also streamlines metadata interchange between third-party systems, and metadata enrichment services to enable users to attain more value from their assets.

■Etere DiskLibrary
Etere DiskLibrary is an advanced hybrid archive software designed for long-term storage, utilizing a cost-efficient combination of sleeping disks. It offers a smart alternative to traditional LTO tapes and Optical Disc Archive (ODA) libraries, supporting a versatile mix of archive enclosures and disk technologies.

■Sony Optical Disc Archive
Etere seamlessly integrates the high standards, innovative technologies, and reliability of Sony's Optical Disc Archive products into its tapeless workflow solutions, including Media Asset Management (MAM) and Hierarchical Storage Management (HSM).

■Linear Tape-Open (LTO) Storage
Etere HSM supports Linear Tape-Open (LTO) technology up to LTO-8, which offers more than double the storage capacity of previous generations and up to 20% greater performance. LTO technology features LTFS, WORM (Write Once, Read Many), and AES 256-bit hardware encryption for robust protection of sensitive data.

■Etere HSM
Etere Hierarchical Storage Management (HSM) intelligently manages and migrates video content across various storage media. Its customizable data movement policies are designed to strike an optimal balance between performance and cost-efficiency.
