New MAM Web Interface for Post Production

Etere will present a new Media Asset Management interface for post-production, that incorporates a brand new interface that boasts page speed and operational efficiency. Users can look forward to a better user experience with new and improved features.

Nunzio

Nunzio is a highly-flexible and cost-effective solution with fully empowered NRCS capabilities to manage the entire tapeless workflow of a Newsroom environment, starting from the planning of news stories (virtual assets) to the control of on-air playback.

Channel-in-a-box with Master control

Etere, the pioneer of IT-based playout, is a worldwide provider of comprehensive and integrative software solutions for an easy management of all the functions within a Media company. Etere solutions are designed with more efficient workflows that are also fully scalable to your organisation's needs. Etere has always been an innovator in broadcast and integrating the traditional Master Control functions into its IT-based playout solutions to ensure that you get the best returns on your investments.

Etere Automation

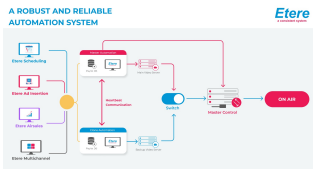

Etere Automation is a powerful, reliable and modular broadcasting system that is able to enhance broadcasters' potential in terms of functionalities and workflow design. Its unique approach combines real-time device control and Media Asset Management in a single product, offering a powerful mix of solutions and capabilities. It is a system to fit all broadcaster needs.
