ETERE MASTER CONTROL

EtereWeb
Etere 27.1 enhances Etereweb experience with EtereWeb 2.0 which comes equipped with a brand new interface and fixes across various modules including Etere Wplayer, Etere Memory browser, Media Library and more. Etere is moving to the web. Supported by a customizable and secure rights management system, the new Etereweb 2.0 will enhance user experience with its intuitive interface designed for fast access to information and files on the move.

Airsales on Web with Enhanced Capabilities
Etere Airsales on web provides a quick and convenient access to order management of programs and commercials, designed to improve broadcasters' agility and business flexibility. With Etere 27.1, users are now able to view the episode number for multiple series and download documents imported by Media Library via an intuitive web interface.

Best returns with FREE Etere QC
Etere QC is now a free integrated module with Etere 27.1. Users are able to check the audio and video quality either prior (e.g. playout, repurpose, archiving) or after (e.g. encoding, ingest, editing, transcoding, archiving) media operations. Etere QC is capable of checking all the main videofile codecs and wrapper of any resolution including 4K. It automatically detects and marks audio and video issues such as freeze frames, black frames, scene changes, audio loss and more.

Etere Memory is Equipped with Multiple Codecs Compatibility, QC and Loudness Check
With the new upgrade, Etere Memory comes equipped with support for multiple codecs including H264. Memory is also integrated with QC for signal and loudness control. An advanced option includes the program's recognition based on fingerprints.

Etere ETX with Master Control Provides Maximum Flexibility
Etere ETX with master control is a complete file-based solution that allows users to perform all CG functions including playout, switch, fade, logo insertion with only one server.
Etere ETX is Compatible with Matrox Video Cards
Etere ETX is now compatible with Matrox DSX, DSXLE3 and XMIO2 cards. All users of MTX system can upgrade to ETX at no additional costs.
4k-ready ETX is one of the most innovative video management system and channel-in-a-box on the market, based completely on IT technology. It is compatible with a wide range of video cards and third-party hardware, providing one of the best interoperability in the market.

Streamlined Workflows with Etere ETX-G Graphics MAM
With Etere 27.1, users are able to manage the properties and run ETX preview of proxy with logos, CG effects and crawls, directly from Media Asset Management for Etere. This allows a complete workflow of preview and approval. ETX-G is the first system that allows users to control both the graphics and the video from the same system. Etere MERP concept gives you a better performance with the ability to manage access, produce and archive content from a single interface!
