video editor

video editor

Professionally edit videos, advertisements, news clips and more with **Etere Video Editor**. Part of the **Etere Media Asset Management** solution, users can now edit and enhance files that are stored in their MAM database. **Etere Video Editor** provides users with a full suite of editorial tools to edit videos, create animated titles and effects, and refine audio, in a fully integrated software.

As part of the **Etere Media Asset Management (MAM)** system, **Etere Video Editor** is directly connected to the **Etere MAM** database, allowing users to easily modify media items already stored in the database. The connection also streamlines the import and export process into the **Etere Video Editor** for a more efficient operation. The integration into the **HSM system** ensures that all files are safely archived, ensuring that no media is accidentally lost in the editing process.

Integrated with Nunzio Newsroom, users can quickly add and prepare their clips and videos when all their files are connected in the system, perfect for a fast paced environment where quick additions and edits are needed. Save and edit old and new projects directly from the database, and insert graphics, text, and effects as needed.

The user friendly **Etere Video Editor** ensures that even beginners will be able to use this software to streamline their workflow by providing a quick editing and export process. Offering a wide range of editing tools such as fully customisable transitions and effects, as well as in-depth direct audio editing that allows users to edit audio tracks, **Etere Video Editor** is a versatile software tool for all media and entertainment workflows.

## Key Features

- Store and retrieve directly from Etere MAM database
- Digital video effects, including brightness, gamma, hue, greyscale, chroma key (bluescreen / greenscreen)
- Support for many video, audio, and image formats

- Frame accuracy (step through each frame of video)
- Time-mapping and speed changes on clips (slow/fast, forward/backward, etc...)
- Audio mixing and editing

## Integrated with Media Asset Management and HSM

**Etere Video Editor** is directly linked to the **Etere Media Asset Management (MAM) system**, streamlining your production process as not only can you save projects to the **MAM** database, you can edit the media and objects stored in your **MAM** database, and your work will be safely archived by the **Etere HSM Archive**.

## Powerful Editing

With a strong key frame animation framework, **Etere Video Editor** introduces an unlimited number of key frames, tracks and layers that allows users to animate and enhance any elements in their videos. Users also have access to unlimited previews. Equipped with over 400 transitions, animations, and effects, including brightness, gamma, hue, greyscale, chroma key, slow motion time effects and more. Etere Video Editor is equipped with fully customisable features and users can either use the preset effects or customise the playback speed and direction. The software can also execute in-depth edits of the audio such as splitting the audio from the video clip, and adjusting each audio channel individually. The Etere Video Editor features a user-friendly drag and drop interface that is highly intuitive for a more efficient workflow.
