Nunzio Newsroom now supports Dante Audio

Nunzio Newsroom can now use Dante to integrate with the Audio workflows of the news playout.

Etere's newsroom playout, Nunzio Newsroom, receives an upgrade to improve the software program's audio system. Users can now experience a higher level of audio quality when recording and broadcasting their news with Dante.

Dante is an uncompressed multi-channel digital media networking technology, with near-zero latency and synchronization. This software is the latest industry standard to ensure smooth transmission of audio over a standard IP network.

Users of Nunzio Newsroom can expect better audio and faster transmissions, that translate to better broadcasts for both recorded and live news broadcasts.
