

Etere HSM Moves Processes to Windows Service for Increased Speed and Reliability

New Etere HSM improves its speed, operational flexibility and reliability with a move to Windows Service, enabling seamless integration between traditional and cloud storage.

HSM Diagram

Digital transformation is at the heart of Etere systems. Etere introduces a full migration of solutions to **Etere Web** that allows management, diagnostic and monitoring control from any smart device. In the latest release, **Etere HSM** moves processes including status updates, archival and restoration requests to Windows Service to incorporate faster speeds and a better performance. Etere leverages the benefits of Windows Service which can run thousands of automatic processes executed at predefined intervals. Etere HSM can be accessed from any location in the world, bridging inter-connectivity across distributed teams as well as ensuring operational flexibility and resilience for mission-critical operations.

Get the Information you need on a Centralized Dashboard

- Real-time statuses of tapes (Offline/In slot/In the Drive)
- Precise slot, drive and rack details
- On-demand information on the free space available on tapes
- Real-time statuses (Aborted/Error/Completed/Scheduled) of work queue lists
- Mixing online and Cloud archive storage

Etere Web HSM

Etere HSM empowers broadcasters and content creators with complete control of their archive management. The centralized console of Etere HSM allows users to manage all archives in a single integrated library, including a mix of proprietary and/or industry file systems such as Linear Tape-Open (LTO) storage, Sony Optical Disc Archive (ODA) storage, Disk Archive, Object Storage and Cloud Storage. Regardless of your deployment choice - Cloud, On-premise or Hybrid, Etere allows you to optimize your storage architectures easily to keep up with evolving business needs.
