Etere Web Multiplatform

Etere Web

Etere Media Asset Management (MAM) is available on the **Etere Web** platform to manage all core functions of the Etere software application. It features an integrated dashboard with real-time data about your system performance metrics and analytics data that help you to make informed decisions, including,

- CPU usage
- Memory usage
- Connected users
- Total login time
- Version number
- Total assets
- Number of files registered in Media Asset Management
- Total size of files
- Total number of running workflow instances
- Total number of T-workflows waiting
- Total number of T-workflows on error
- Overview data of a specific type of files (for example, Live, Memo, Film)
- Data chart of SQL performances
- Top 10 CPU usage by query

It includes integrated features such as real-time playlist management, search, preview, edit, download, and upload media files, management of commercial orders and programming, and resource management for tasks and approvals. Now you can access your workflows even while on the move with Etere Web's compatibility on all smart devices, including tablets, laptops, and smartphones. The accessibility of Etere Web makes it easy for distributed teams to collaborate in real-time on a centralized database. With an authorized login, users can access Etere Web and manage the data to which they have access rights.

Media Asset Management

About Etere

Since its beginnings in 1987, Etere has been preparing users for the future. Etere is a worldwide provider of broadcast and media software solutions backed by its mark of excellence in system design, flexibility, and reliability.
