Web Cutting

Web Cutting 3

Etere revolutionizes remote collaboration between teams with a new editing feature, giving you the tools to collaborate and edit media files remotely from an HTML5 interface. Now, you can manage all your content from any location and any smart device connected to the internet. With seamless synchronizations by Etere T-Workflow, we've made it easy for multiple users to access and edit files in the media library concurrently. Subsequently, the edited files can be accessed without rendering in Etere Payout or exporting as a new file using the Etere T-Workflow. This feature brings Etere users a new generation of media management tools to meet the challenges of today's remote working environments.

Etere MAM: Discover a New Generation of Content Management

Etere Media Asset Management is the software that redefines media management. With the latest software upgrade, Etere users now have access to perform editing remotely on any HTML5 interface. The newest feature enables multiple users to access MAM files concurrently for an enhanced collaborative experience.

Etere MAM manages the complete media cycle covering ingest, transcoding, content retrievals, metadata association, and asset distribution. It is a complete software solution running on Commercial-Off-The-Shelf (COTS) hardware. Besides a Windows-compatible application, it is also available as a web platform accessible on any internet browser. Etere empowers media professionals with the software tools to thrive and optimize the value of their media content.
