Nunzio on Mobile app

Take your work with you on the go with **Nunzio Newsroom Mobile**. Edit, and manage your work from your smartphone, and send it directly, no matter where you are.

Nunzio Newsroom has been repurposed for mobile for the on-the-go reporter. The **Nunzio Newsroom Mobile** mobile interface provides a user-friendly experience across multiple platforms such as smartphones and tablets. Alongside the rich widget set, integrative framework and fast performance, news creators are equipped with all the tools they need to prepare a good story on the go. With **Nunzio Newsroom Mobile**, users can work from any location as long as they are connected to the internet.

The mobile-optimized interface allows users to access core features quickly to meet the demands of fast-paced news operations. All users of the **Nunzio Newsroom Mobile** access the platform with a secured log in. Once logged in, users can select any task and perform changes including prepare, check and approve stories. The agenda feature allows users to manage their day-to-day activities with the creation of tasks and appointments. At any point of time, users are able to create/edit news stories, description, start date, due date and priority of tasks.

Nunzio Newsroom Mobile enables you to develop a story from the initial idea to broadcast. After all, if your news is on the move, why shouldn't you be as well?
■**Real-Time Updates:** Stay connected with the team on the move with Etere's real-time tracking and updates. With Etere, you can work faster and focus on producing compelling content while we manage the rest
■**Team Collaborations:** From journalists to editors, Etere Nunzio application instantly displays all agenda and tasks of the team. With the roles and rights configured, authorized users can preview, assign, approve and edit tasks of team members
■ **Intuitive User Interface:** Optimized for mobile phones and tablets with larger navigation buttons, reformatted content and optimized images, all for an exceptional user experience for the busy journalist on the move
■ **Faster and Easier:** Applications are usually 1.5 times faster than mobile websites as it stores data locally on the device. With faster performance and easy connectivity, users are able to increase operational efficiency and use smart technology to their advantage
