Achieve content readiness and maximize investment returns effortlessly with **Etere Advanced QC**. Experience lightning-fast QC tasks surpassing real-time speeds. With its basic license, analyze up to 4 files concurrently, ensuring unmatched efficiency. This robust, cloud-ready software is not only cost-effective but also very innovative.

Etere Advanced QC's web-based platform has rich features to simplify QC analysis configuration, eliminating inaccuracies and time drains.

This dynamic software supports simultaneous multi-user access, multi-format compatibility, and multi-level reporting, facilitating parallel analysis of multiple sources for unparalleled operational efficiency. Seamlessly configure one-time analyses with numerous threshold adjustments, saving valuable time.

Etere Advanced QC's adaptable system, perfectly suited for expanding environments, makes scalability effortless. Upgrade your QC processes today and revolutionize your workflow with Etere Advanced QC.

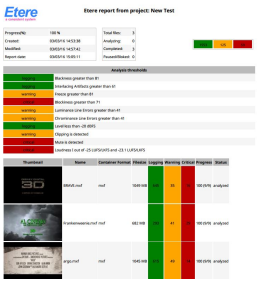
## Key Features

☐ Straight-forward API for seamless integration in third-party applications
☐ Clustering and modular architecture, easy load balancing
☐ Support for most standard formats, including HEVC for compressed 4K content
☐ Audio loudness analysis, including EBU R128
☐ Syntax error detection
☐ Access to networked content repositories
☐ In-depth analysis of contents with frame/waveform detailed view
☐ Reporting of time codes and frame references
☐ UNICODE support for extended character sets
☐ One-time analysis that can be configured with multiple threshold changes
☐ Effective load-balancing capabilities
☐ Distributed architecture provides high redundancy
☐ Fault tolerant & fault resilient
☐ Analyse up to 4 files at the same time with the basic license
☐ Fully workflow driven
☐ QC results integrated into the Etere database

## The Etere Advantage

☐ Dedicated worldwide 24/7 support
☐ Free upgrades
☐ Mark of quality, consistency, and reliability since 1987
☐ The only company to offer an end-to-end workflow solution for any broadcast and media company

## Detection Parameters



☐ Video Block, video blur
☐ Digital Betacam Errors
☐ DV Artifacts
☐ Luminance & Chrominance Line Errors
☐ Interlacing Artifacts
☐ Field Order Detection
☐ Audio Clipping
☐ Flash/Strobe artifacts
☐ Scene Cut Detection
☐ Min. & Max. Luminance Level
☐ Chroma Headroom Violations
☐ Super Black
☐ Luminance headroom Violations
☐ Black Frame Detection
☐ Brightness
☐ Contrast
☐ Temporal Complexity
☐ Picture Quality Score
☐ Sequence Quality Score
☐ Audio Levels (DBFS, silence, and absence)
☐ Freeze Frame Detection
