Etere Web Multiplatform

Etere Ecosystem

Etere launches an all-new 64 bits Data Mover application for enhanced security and performance. When launched, the data mover application stays as a service for an extra layer of security. Additionally, with a 64-bit system, you can access up to 264 memory RAM, resulting in faster performance. Users can access Etere data mover on any web browser and manage it from anywhere. All that is needed is a secured login with your Etere credentials.

Etere remains committed to its research and development and releases new software several times yearly. Etere keeps your system ready for future demands in the industry.

About Etere Data Mover

Etere Data Mover manages digital content transfers, copies, and movements from one level to another based on customizable workflow rules.

Etere Data Mover is an all-in-one solution with features including:

- Multi-Device connection
- System fault tolerance
- Multi-media library management
- Low-Res Video Transcoding
- Proactive cache management
- Scheduling / MAM Prefetch
- Newsroom integration
- Watch folder management
- Distributed processing with the use of an independent agent per data transfer
- Copy video files from one video server to another, even for files located in different remote locations
- Based on configurable workflows
- Concurrent processing for simultaneous performance of different instances of a single data transfer
- Works with Etere Transcoder to convert bit rates, provide encoding and decoding between media formats, change video resolutions to meet lower-resolution screens
- Set custom rules for automatic file naming
- Easy insertion of closed captions, including CEA 608 and CEA 708
- Supports Microservices
- Supports insertion of multi-layer graphics and WebGL graphics
- Custom rules for auto file naming
- Supports Microservices

About Etere

Since its beginnings in 1987, Etere has been preparing users for the future. Etere is a worldwide provider of broadcast and media software solutions backed by its mark of excellence in system design, flexibility, and reliability. The revolutionary concept of Etere Ecosystem promotes real-time collaborations and enhances operational efficiency across the entire enterprise. Etere Ecosystem software solutions manage the end-to-end media workflow and feature an integrative Web and Windows architecture that is customizable to fit perfectly in any system.

Etere delivers on its service excellence commitment with a 24/7 worldwide support and inclusive software updates. Its digital technologies and market-proven remote/on-site services such as consultancy, training, installation, and demonstrations are ready to run with your business no matter where you are. Etere enhances your adaptability for the future and empowers you with the most innovative software tools to drive your business to greater heights.
