

Etere Nunzio Newsroom Offers an On-Premise Permanent License

Etere offers professional newsroom software with an on-premise, permanent license. Unlike a Software as a Service (SaaS) model, users own the software after purchase. More importantly, Etere has never discontinued a product or forced customers to change their system in the last 32 years.

Etere offers both options of a permanent license and software as a Service (SaaS). We have you covered even if you do not use cloud services; Etere empowers you to select what works best for your business - on-premise, cloud, or hybrid models, allowing you to choose the best setup for your business. Unlike system providers that only offer SaaS and discontinue a product after a few years, Etere will never force a change on our customers. Instead, we believe in giving you the best value for your investments through free software updates and upgrades, making your purchase an asset with better returns in the long run.

Integration with Blackmagic DaVinci Resolve for an Integrated Solution Without a Subscription

Etere will soon be compatible with Blackmagic DaVinci Resolve, a post-production video editing application that does not require a subscription. Etere BMD Davinci Resolve panel will connect the Etere Nunzio database with BMD Davinci Resolve. With the seamless integration between Etere Ecosystem and BMD Davinci Resolve, content editors can access the professional editing, colour, effects, and post-production video editing software by Blackmagic directly from the Etere interface.

Unlimited Software Updates and Upgrades

Additionally, all Etere users on a support contract have unlimited software updates and upgrades. When you select an Etere system, you are not just buying a product or service; you are investing in a system consistent with its license policy and ready to adapt to your future needs.

Professional 24/7 Global Support

The Etere team is on standby 24/7 to help you succeed and get the results you need; whether it is troubleshooting an issue or customizing workflows, the Etere support service is always available for all Etere users on a support contract. Furthermore, Etere users have access to unlimited software updates and upgrades, keeping your system optimized for the best performance at all times. For example, when Windows applications became popular in the beginning, Etere was one of the first to develop a Windows-compatible interface. Etere delivered the upgrade at no additional cost to all users on a support contract. As part of its commitment to users, Etere invests in its Research and Development to release new features, upgrades and security patches several times per year, keeping your Etere system optimized at all times.

Etere Nunzio Newsroom Enhances Your Workflows

Etere Nunzio Newsroom empowers users to work faster and better. With its full NRCS features, users can easily manage the end-to-end workflow of any newsroom environment, from planning news stories to managing newsroom automation on-air playback. Furthermore, it can concurrently handle complex stories with multiple media elements, including video files, live streams, graphics, and secondary media files.
