SQL Server 2022

Windows Server 2022

Microsoft Windows

Etere Ecosystem is now compatible with Windows Server 2022 and SQL Server 2022. The new release is a free upgrade for all Etere users on a support contract. Etere offers 24/7 global support, free software updates and upgrades for all users on a support contract, making it one of the market's most reliable and innovative brands.

Windows Server 2022

As the most secure and reliable server available on the market, Windows Server 2022 has the best security parameters to safeguard the security of data packets and secure your end-to-end IT infrastructure.

Benefits of Windows Server 2022

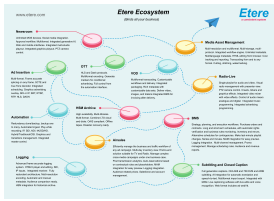

- Applies multi-layer protection against threats with a secured-core server
- Now you can run business-critical workloads such as SQL servers with enhanced 48TB of memory, 64 sockets and 2048 logical cores
- Uses Windows Admin Center for improved VM management, enhanced event viewer and a seamless connection to Azure through Azure Arc
- Better scalability and agility - Windows Server 2022 offers a single cluster containing software-defined computing, storage and networking that enhances scalability and lowers costs
- Integrates hybrid cloud setups the ability to run their applications on-premises or via Microsoft Azure

SQL Server 2022

SQL Server 2022 integrates seamlessly with Azure to supplement the Microsoft Intelligent Data Platform.

Benefits of SQL Server 2022

- Adds object storage integration to the data platform, enabling users to integrate SQL Server with S3-compatible object storage in addition to Azure Storage
- Data Virtualization feature allows users to query different types of data on different types of data sources from SQL Server
- Connects to SQL Server using Azure AD authentication on Linux and Windows servers if they are Azure Arc-enabled servers
- Higher availability - Provides a direct replication link between your on-premise VMs and an Azure SQL Managed Instance, taking the hassle out of managing the underlying disaster recovery infrastructure
- Integrates with Microsoft Purview, eases data administration across both on-premises and multi-cloud environments
- Connects SQL Server instances to an Azure SQL Server-managed instance, allowing users to offload read-only workloads to the cloud

Etere Ecosystem

About Etere

Since its beginnings in 1987, Etere has been preparing users for the future. Etere is a worldwide provider of broadcast and media software solutions backed by its mark of excellence in system design, flexibility, and reliability. The revolutionary concept of Etere Ecosystem promotes real-time collaborations and enhances operational efficiency across the entire enterprise. Etere Ecosystem software solutions manage the end-to-end media workflow and feature an integrative Web and Windows architecture that is customizable to fit perfectly in any system.

Etere delivers on its service excellence commitment with a 24/7 worldwide support and inclusive software updates. Its digital technologies and market-proven remote/on-site services such as consultancy, training, installation, and demonstrations are ready to run with your business no matter where you are. Etere enhances your adaptability for the future and empowers you with the most innovative software tools to drive your business to greater heights.
