will provide to the Taipei television a big advantage: the integration of all myriad processes with consequent control and saving of time and expenses

MOMO is adding 3 new playlists a disk based storage, a new Harmonic mediadeck videoservers and an integrated HSM archive based on the last LTO6 technology. A load balanced cluster of an Hires transcoding servers, will provide all the file based operation, including audio leveling and transcoding.

With ETERE MERP you will give to your company the opportunity to have only one system to manage the production facilities (newsroom, production, postproduction, playout, etc.) and administration tools (scheduling, planning, CRM and Business Intelligence).

ETERE systems are used around the world and its solutions are delivered through a dedicated professional and integration services department to ensure the highest possible standards.
