CHT MULTIPLIES CHANNEL

Etere's flexible solution for CHT is the key software for performance enhancement

Tolentino, 23 April 2008 Etere's software solution meets the demands of CHT Chunghwa Telecom Co Ltd, the largest telecom industry in Taiwan, for a flexible and integrated solution.

After less than a year of operation, CHT has increased its workflow and needs to expand its broadcast capability maintaining quality and reliability. Etere has extended CHT's solution providing them with a playout automation for two additional channels.

CHT has confirmed its trust in Etere advanced technology and has acquired an option for a fourth channel automation to be completed in 2008. This is one of the proofs of Etere software's high performance.

Etere's leading technology is developed focusing on the broadcasting market's requests and once again the client confirms Etere as the best choice.

CHT also confirms Omneon as the main Videoserver system and Ntype as the system integration company.

Etere controls the following devices:

9 Omneon mediaports

3 Sony Ingest VTRs

2 Evertz AV routers

4 Evertz Master controls

4 Avid Character Generators
