

Airsales
Etereweb

Etere
a consistent system

Etere Vision

- Etere manages the scheduling with a real ERP approach
- Etere has a single Database with a single copy of the information
- Etere has no import, export or consolidation
- Etere workflow is linear and always consistent
- The MERP workflow allows saving of time and money

Airsales on Web

Airsales module enables modification, creation of new contract and presents information on TV series in the database:

- **Seasons**
- **Episode number**
- **Scheduled duration**
- **Linked assets**

Search

The screenshot displays the Etere Air Sales search interface. The top left features the Etere logo and a navigation sidebar. The main area is titled "Air Sales" and contains a "Search contract" section with various filters and an "Apply filter" button. Below this is a table with one data row.

Station	Station name
Owner	User who created the order line
Type	Type of order line

New Order

The screenshot displays the 'New Contract' page in the Etere web application. The interface features a dark sidebar on the left with the Etere logo and a navigation menu. The main content area is a form with the following fields:

- Code:** MSC
- Description:** My Sample Contract
- Customer:** 01 (selected from a dropdown menu showing 'antonio@italy.etere.com')

A blue 'Create' button is located below the Customer field. The top right of the page shows the user's email address: antonio@italy.etere.com. The bottom right corner contains the text 'Etereweb - Etere pte ltd'.

New Order

To create new contract , enter the parameters:

Fields	Description
Code	Assign a code to the new contract
Description	Assign a description of the contract for reference
Customer	Search for and assign a customer ID based on registered information in the database
Title	Assign a title to identify the contract

Advantages

- **Stay connected in distributed work environments**
- **Fast connection**
- **Live updates**
- **Single database for a single point of reference**
- **Improves operational efficiency**
